IMPORTED FROM LITHUANIA · AVAILABLE IN THE UAE

areeqa

Perfectly natural mineral spring water

BRAND & PRODUCT PRESENTATION

AT A GLANCE

A rare natural water, from Europe to the UAE

Areeqa is a natural mineral spring water sourced from deep wells in the protected forests of Lithuania, bottled directly at the source and imported to the United Arab Emirates.

8.0 pH

NATURALLY ALKALINE

No ionizers, no additives, no purification processes.

0

NITRATES & NITRITES

One of the few natural mineral waters in the world to achieve this.

236 mg/L

TOTAL DISSOLVED SOLIDS

Gently mineralized for a clean, soft, refreshing taste.

PURITY

Water as nature intended it

Naturally filtered through underground rock and sand within Lithuania's 58,000-hectare Dzūkija National Park, Areeqa emerges completely free of nitrates and nitrites.

15+ years for a single drop to become Areeqa, filtered slowly through the earth.

Naturally Alkaline

With a natural pH of 8.0, Areeqa supports the body's oxygen absorption and faster hydration.

Zero Nitrates

Protected deep underground from agricultural runoff and industrial contaminants.

Smooth Taste

Very low sodium (2.3 mg/L), rich in silica (20.2 mg/L), and gently mineralized: clean, soft and refreshing.

MINERAL COMPOSITION

What's inside every sip

The human body cannot produce essential minerals on its own. Areeqa's are naturally dissolved and readily absorbed.

236 mg/L

TOTAL DISSOLVED SOLIDS

Ring fill shows each mineral relative to total dissolved solids

ORIGIN

Born in the forests of Lithuania

Sourced from deep wells within the forests of Birštonas and the Dzūkija National Park, and bottled directly at the source, untouched by chemical or industrial treatment.

1924
Founded as Lithuania's first industrial mineral water bottler

58,000 ha
Protected Dzūkija National Park surrounds the source

15+ years
Natural underground filtration journey for every drop

100%
Safe: ultraclean closed-system bottling technology

areeqa

FROM SOURCE TO SEAL

The journey of every bottle

From the pristine heart of Europe to the UAE, every bottle carries the purity of its origin.

DZŪKIJA

Protected forest

Rain falls on a 58,000 ha national park, far from industry.

15+ YEARS

Natural filtration

Water slowly filters through underground rock and sand.

BIRŠTONAS

Deep wells

Drawn from deep, protected wells, free of nitrates.

AT THE SOURCE

Ultraclean bottling

Sealed in a closed system with no chemical treatment.

DUBAI, UAE

Imported to the UAE

Imported and distributed across the Emirates.

PRODUCT RANGE

Crafted for every moment

From premium glass for the dining table to convenient PET sizes for everyday hydration.

Premium Glass

STILL & SPARKLING

Designed for fine dining and hospitality. Elegant, refined and fully recyclable.

330 mL · 750 mL

PET Bottles

STILL & LIGHTLY CARBONATED

For everyday use. Lightweight and convenient, free of harmful compounds.

500 mL · 1 L · 1.5 L · 2 L

Flavoured

LIGHTLY CARBONATED, REAL FRUIT

Lemon, peach, red berry, orange and Tahiti lime. No sugar, no sweeteners.

600 mL

Every format is **BPA, BPS, BPF and PFAS free**.

FOR HOSPITALITY & RETAIL

Made for the table, ready for every day

Fine dining & hotels
Premium 330 mL and 750 mL glass, still and sparkling.

Everyday hydration
PET formats from 500 mL to 2 L for retail and on the go.

Suitable for the whole family
Meets the baby water standard.

FLAVOURED RANGE · 600 ML

- Lemon
- Peach
- Red berry
- Orange
- Tahiti lime

TECHNOLOGY

Ultraclean bottling, 100% safe

A closed-system process ensures that from source to seal, nothing compromises the water's natural purity.

1

Decontamination

Microparticles are removed from each blank and disinfected with UV rays. Caps are washed with ionized air.

2

Filtered Air

Forming, filling and capping run in one system continuously supplied with filtered air.

3

Closed System

Filled in a sealed environment, fully protected from environmental contamination.

QUALITY & CERTIFICATION

Held to international standards

Produced under globally recognised food-safety certifications, in packaging free of harmful compounds.

BRC
